

Balazs Ferencz

JUNIOR WEB DEVELOPER – FRONT END

PERSONAL STATEMENT

Ever since the moment my first “Hello World” appeared in my console, I knew right away with a huge smile on my face that I got hooked into the world of software development. The more complex my projects became the more excited I got about the whole field. Also the more knowledge I gained the more I realized how much more there is to know, which pushed my curiosity and motivation even further. I am right now looking for an opportunity to turn my passion into a profession by becoming a web developer.

Mathematics, IT, German Language, History, Literature

PRACTICE PROJECTS

<https://pici1985.github.io/PortfolioGit> - A portfolio website to showcase my work for recruiters. Extensive use of Bootstrap Framework

<https://pici1985.github.io/Timer> - A stopwatch app to count study session times. Also has a practice “backend”.

<https://pici1985.github.io/RPS> - Classic rock/paper/scissors game, created with a mobile first approach. Fully responsive using the CSS grid layout.

<https://pici1985.github.io/BMIFinished> - A simple BMI calculator app with a bit of fun involved. Fully responsive created with CSS flexbox layout.

<https://pici1985.github.io/react-todo> -A typical practice To-Do app. Created with the React library of JavaScript.

<https://pici1985.github.io/MySkiHolidays> - A static website with navigation-bar and some effects. Work in progress.

PERSONAL SKILLS

KNOWLEDGE BASE

- **HTML5:** Writing semantic HTML, solid knowledge of forms, validations, conventions and best practices.
- **CSS3:** Practical knowledge of selectors and design, ability to create responsive layouts with a mobile first approach.
- **JavaScript:** Knowledge of DOM manipulation methods, fetch API, ability to apply object oriented design principles. Also knowledge of the REACT framework.
- **Python:** next to a fundamental knowledge of the language itself, experience using the **Flask** library, also some data analytics using the **Pandas** library
- Sound knowledge of Version Control Systems like **GitHub**
- Good understanding of **Bootstrap** and **JQuery**
- Excellent written and oral communication skills
- Firm analytical and interpersonal skills
